

Sanding Drum / Sanding Cylinder

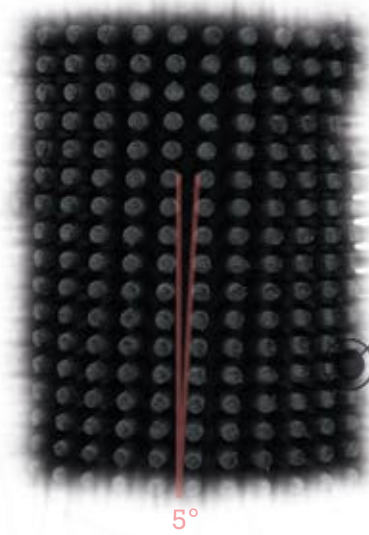

The sanding drum is a tool for sanding wood and metals of all kinds. The basic aluminum body and the flexible elastic knobs profile give the grinder a robust stability, finally gives an excellent sanding result.

5° degree

Perfect sanding result

The spirally arranged knobs and the cover of the tool ensure that the sanding abrasive remain firmly in place during usage. Thus, the life time of the abrasive is increased by a multiple, at the same time it becomes an excellent sanding picture.

The sanding drum can be used on all machines with an rotating shaft.

Both, for spindle moulders and hand machines.

The drum is also perfect suitable for spindle table motors and CNC machines.

Degreed Knobs

Fixed sanding abrasive

The degreed tips of the rubber knobs give the sanding abrasive a special firm hold and contribute to a perfect sanding result.

Available Variants

Diameter	Sanding Hight	Bore/Shaft
40mm	120mm	12,7mm ½" Shaft
80mm	120mm	30mm 1" 1¼"
90mm	120mm	50mm
110mm	120mm	30mm 1" 1¼"
150mm	120mm	30mm 1" 1¼"

*Grit 80-180 | other grits on request
